SUMMARY

Software developer with hands-on experience across the full development lifecycle, including building, testing, deploying, and documenting web applications in Python, JavaScript, and Node.js for small business and municipal clients. CompTIA Security+ certified, with Professional Scrum Master and Scrum Product Owner certifications reflecting direct familiarity with Agile/Scrum methodologies. Comfortable working independently and collaboratively, translating client and stakeholder needs into working software, and training end users on new systems.

TECHNICAL SKILLS

Languages & Frameworks: JavaScript, Python, Node.js, HTML, CSS, Angular, Express, Git

Databases & APIs: MongoDB, SQLite, PostgreSQL, RESTful API integration

Command Line: Comfortable working in the terminal for navigation, Git operations, and running local dev environments

Methodologies: Agile, Scrum (PSM I, PSPO I certified)

Cloud & Hosting: Render, DigitalOcean (deployment, server/hosting configuration)

Platforms: WordPress, Squarespace administration

Security: CompTIA Security+

Other: Hardware/equipment installation, troubleshooting, and inventory management; end-user training and support; technical documentation

SELECTED PROJECTS

Family Tips App

- Built a full-stack web app using Angular, Express, and MongoDB, designing the database schema and connecting the frontend to a custom backend API, deployed live on Render.

NourishMate

- Built a nutrition-tracking app pulling live nutrition facts from the Spoonacular API, backed by a PostgreSQL database for persistent user data, deployed live on Render.

Weather and Local Radio App

- Built an app returning current weather and local radio stations for any searched location, integrating a weather API and a radio station API into one search experience.

Space Game (NASA APOD Integration)

- Built a browser-based space game pulling images from NASA's Astronomy Picture of the Day API, first building a searchable photo-album app around the API, then reusing that integration for in-game background art.

PROFESSIONAL EXPERIENCE

Founder, A Digital Media Studio

2025 – Present

Self-employed | 40 hrs/week

- A Digital Media Studio is a full-service digital media company serving small businesses and community organizations, encompassing website design, photography, videography, and drone cinematography, with SugarRat Productions operating as its documentary film division.
- Meet each client's digital media needs, as measured by delivering tailored, brand-aligned content, by communicating directly with clients to understand their goals and designing customized website, photography, or film packages, for example producing aerial drone coverage of a municipal event for a local town government and marketing content for a local small business.

Self-employed | 40 hrs/week

- Provided freelance web application and website development services for small businesses, adapting the system development lifecycle to each client's needs, from requirements gathering through design, build, testing, deployment, and hosting.
- Helped small business clients transition from in-person storefronts to online sales during the COVID-19 pandemic, as measured by moving them from no digital presence to a functioning online storefront, by building e-commerce websites, consolidating product inventory into the new platform, and matching each client to the right platform, whether Squarespace, WordPress, or a custom build.
- Configured, deployed, and maintained server hosting environments for client applications, as measured by keeping client sites live and reliably accessible, by troubleshooting deployment issues, administering hosting on platforms including Render and DigitalOcean, documenting configurations, and training clients to manage their own sites going forward.

ADDITIONAL EXPERIENCE

Event Manager, Relevant Events (Part-time, New York, NY, 2016–2020)

- Managed full-scale event production, staff, and on-site infrastructure for high-profile private weddings and campaign events, working as part of a team with chefs, vendors, and event crews.

Event Manager, Olivier Cheng Catering and Events (Part-time, New York, NY, 2014–2020)

- Built full production sets and event infrastructure for weddings, product launches, and runway shows for clients including Ralph Lauren, Hermès, and Victoria's Secret.

Freelance Videographer, American Museum of Natural History (Intermittent, Part-time, New York, NY, 2014–2020)

- Filmed museum exhibits for circulation to partner museums internationally, handling lighting, camera work, and editing while coordinating shoots around live public foot traffic.

Event Coordinator, Soho House & Co (Full-time, New York, NY, 2009–2013)

- Coordinated private, high-profile member and celebrity events end-to-end. Selected for a new-location opening team, traveling to Los Angeles to train staff.

EDUCATION

Master of Liberal Arts (ALM), Digital Media Design, Harvard Extension School

In progress | Expected completion approx. Fall 2029 | 5 of 12 courses completed | GPA: 4.0

Coursework: Web Programming (Python, JavaScript), Web Application Development (Node.js), Video Editing & Digital Design, Introduction to Media Production, Introduction to Cybersecurity (in progress, Fall 2026)

Bachelor of Science, Sociology, University of North Carolina Wilmington

1996 – 2000

CERTIFICATIONS

- CompTIA Security+ ce Certification, CompTIA (issued August 2026, expires August 2029)
- Professional Scrum Product Owner™ I (PSPO I), Scrum.org (issued August 2025)
- Professional Scrum Master™ I (PSM I), Scrum.org (issued July 2025)
- CS50x: Introduction to Computer Science, Harvard/edX (CS50) (issued April 2024)
- CS50t: Understanding Technology, Harvard/edX (CS50) (issued April 2024)
- The Web Developer Bootcamp, Udemy (completed March 2023)

PURSUING

- Microsoft Azure Fundamentals (AZ-900)
- LPI Linux Essentials
- Hands-on labs via TryHackMe
